- Choose a suitable container with drainage holes.
- Fill with seed raising compost and firm down gently.
- Water generously with fine spray and leave for 30 minutes to allow water to soak into the compost.
- Break off each seedstick carefully and push it gently into the soil, until the seeds are just covered.
- Sprinkle a little water, but make sure the soil remains moist whilst seeds germinate.
- When seedlings emerge leave the stick in position and allow the strongest plant to grow on.

Seed Type

INSTRUCTIONS PANEL
These are the standard
instructions used on this panel -
only the Seed Type will change
or colour of text/graphics.

This area will be tucked
behind tab when folded
into finished product.
Make allowance in artwork.
